- Cycling
- Cinematography
- Puzzling

## About me

I see myself as a creative individual, with a keen eye for detail.

I believe that creating experiences for other people while doing what you enjoy is a worthy task and I will learn my way towards that craft.

## Experience

Freelancer  
Fiverr

Aug 2019 - Apr 2021

I started selling my services really cheap in the first year of university as I wanted to improve and earn some pocket money while drawing with a greater purpose. Along the way, it also improved my communication skills and my problem solving abilities. I did concept art, logos and illustrations.

## Education
